U.S. Patent and Trademark Office PTOL-303 (Rev. 11-03)

Application No.

Continuation of 5. does NOT place the application in condition for allowance because: With regard to the issue of motivation, such has been more than sufficiently shown in the record of the case. Reference is made thereto. Further, contrary to Applicant's remarks, the connecting lines discussed in the rejection which provide the "distribute voltages" inherently have impedance charateristics. This effective impedance will have the "compensated voltage" connected to one end thereof. Thus, it is necessarily true that the voltage provided by these lines "degraded relative to the compensated voltage".
